01

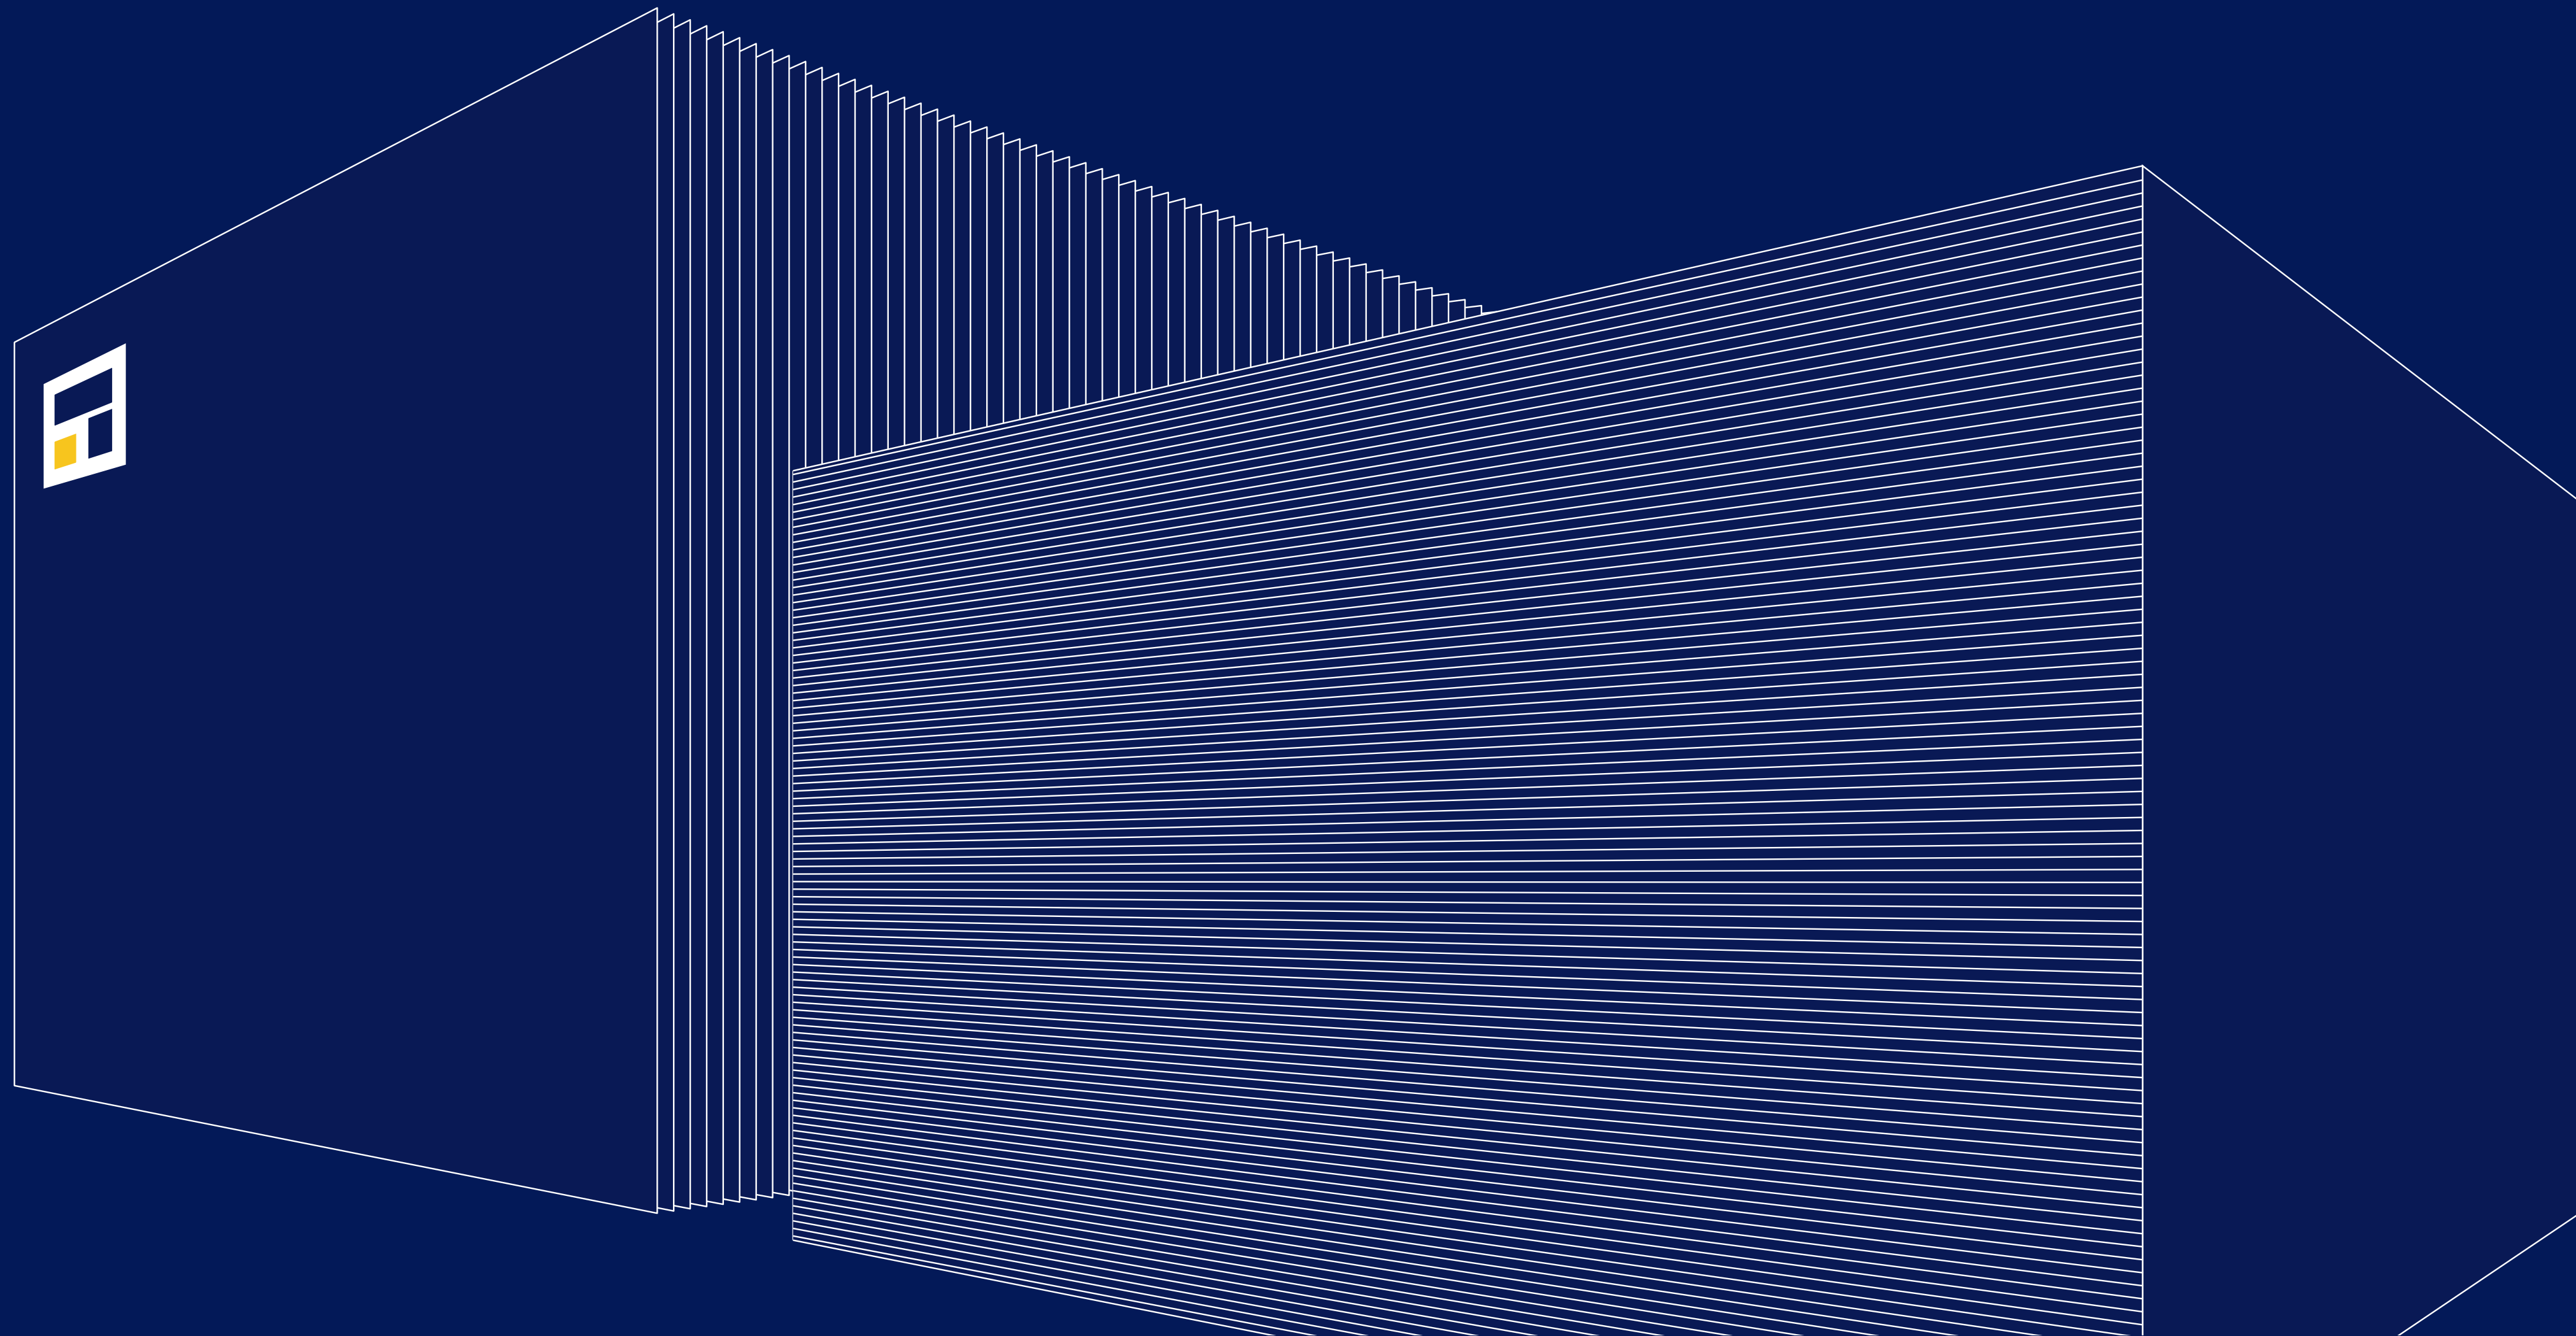

ABOUT ARK PREFAB

ARK PREFAB IS A TECH-DRIVEN MODULAR CONSTRUCTION COMPANY.

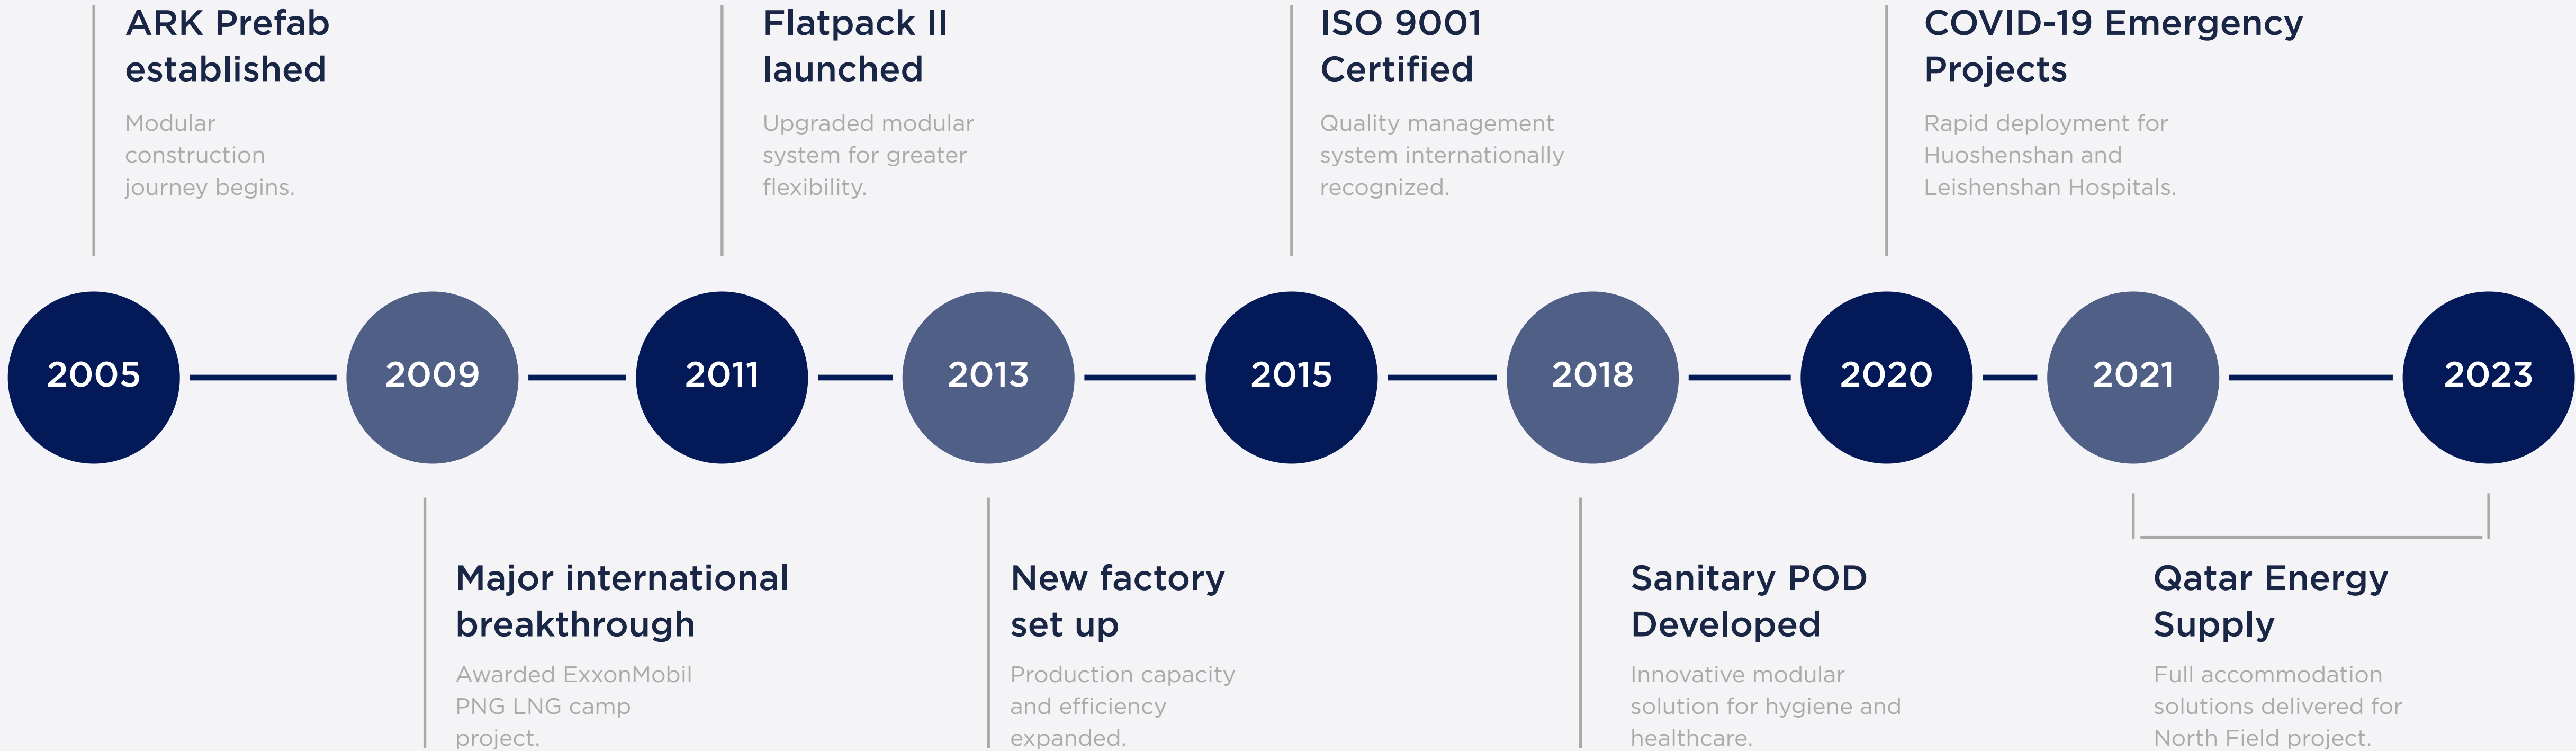

Innovation

Sustainability

Globalization

TIME LINE

OUR MISSION

"Rescue your time" is the core in our activities of providing modular and space solutions to the customers. ARK is not only to supply the modular cabins to accommodate any projects, but also to save the project duration time which would benefit both sides. It's embodied in our EFFECTIVE supplying services and FLEXIBLE modular options.

7

OUR VISION

To be the most innovative and sustainable modular building system supplier in the world focused on modular space solutions for customers who require such facilities to operate and grow their organizations. ARK strives to promote ease of doing business globally and regionally, to be recognized for its focus on customer service excellence.

OUR CORE VALUE

we aimed to provide one-stop space & modular building solutions to the customers, including providing necessary accessory parts related to the prefab housing.

OUR TEAM

Guided by product innovation and customer service excellence, every ARKer collaborates to achieve the best.

- CAD designers craft precise and customer-centric building solutions.
- QC managers & R&D teams continuously innovate to enhance product quality and space efficiency.
- Purchasing engineers source the best materials to optimize performance.

- Project managers bring insights from real-world installations to refine our processes.

At ARK, we take pride in every project we deliver. Thank you for your trust—we'll keep innovating to build a better future together.

Ark’s Shanghai Headquarters Is Home To Four Core Departments: Sales, Technical, Quality Control, And General Affairs. Our Branches Operate With Sales At The Core, Working Closely With Headquarters To Seamlessly Meet The Needs Of Customers Worldwide.

Sales
Dep.

Connects with clients around the world and ensures smooth communication throughout the entire sales process. Represents the company’s image and delivers brand value.

SERVICE

TRUST

Technical
Dep.

Responsible for refining technical drawings and developing innovative structures and products. Drives modular construction with expertise and innovation.

INNOVATION

EXPERTISE

Quality
Inspection
Dep.

Strictly controls product quality to ensure every shipment meets company standards. Pursues excellence and safeguards customer trust.

PRECISION

STANDARDS

General Affairs
Dep.

Manages the entire supply chain and controls production costs. Operates efficiently to support sustainable business growth.

COORDINATION

EFFICIENCY

02

INDUSTRY STATUS ANALYSIS

The Global Modular Building Market Size Reached \$119.9 Billion In 2023 And Is Expected To Increase To \$191.6 Billion By 2028.

—— Beizhesi Market Monitor

With the rapid development of globalization, industrialization, and technology, the traditional construction industry is facing unprecedented challenges and opportunities. Modular construction, as a product of industrialization and technological advancement, is playing an increasingly vital role in modern society.

It represents not only an innovation in building methods but also a new approach to efficiency, sustainability, and cost control. Next, we will delve into the global development trends and market potential of modular construction through a series of data.

The History of Modular Construction

12

19th Century

Used for quick, temporary buildings.

Mid-20th Century

Gained standardization and scalability; applied in schools, hospitals, offices.

Recent Years

Driven by tech and sustainability, it became an efficient and eco-friendly mainstream solution.

No longer a temporary fix

Now a go-to method for high-quality, fast, and reliable construction.

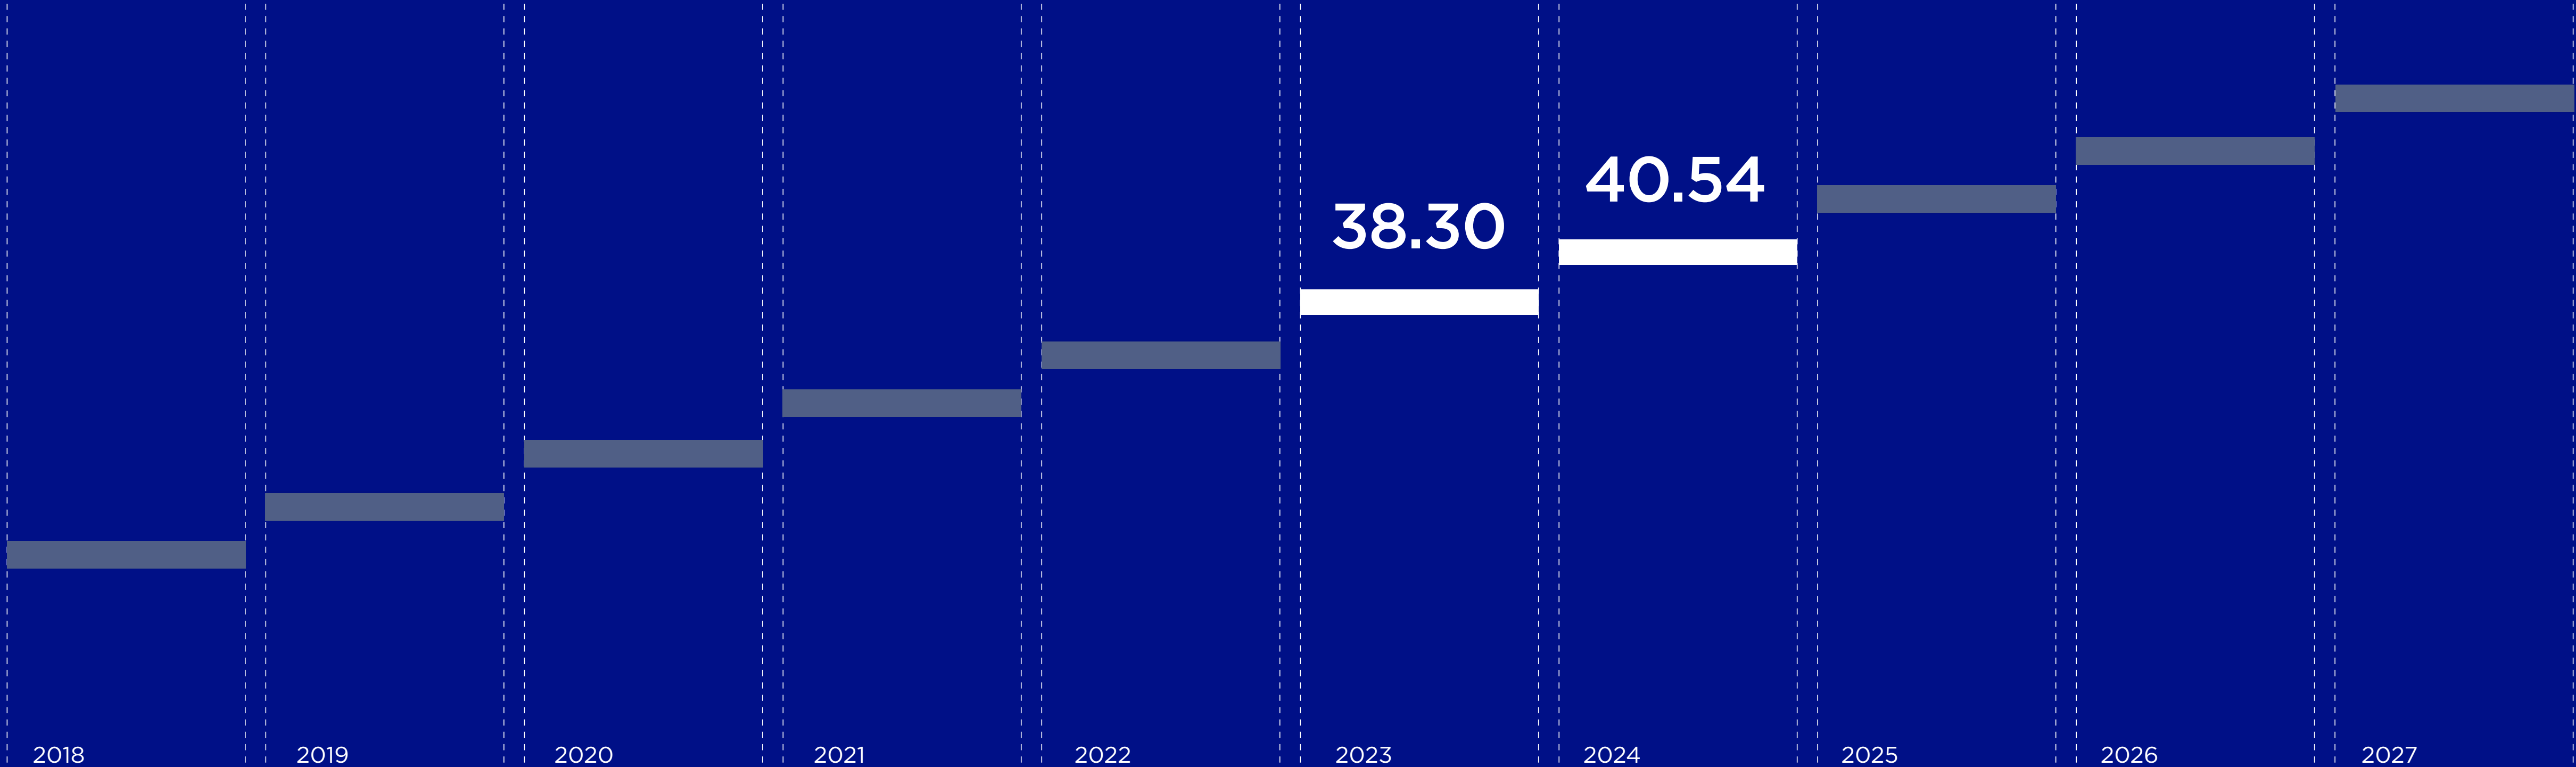

Global Modular Construction Market Growth Rate

(Consider The Asia-Pacific Region)

(USD Billion)

13

6.2%

Information Source:
<https://www.fortunebusinessinsights.com/zh/industry-reports/modular-construction-market-101662>

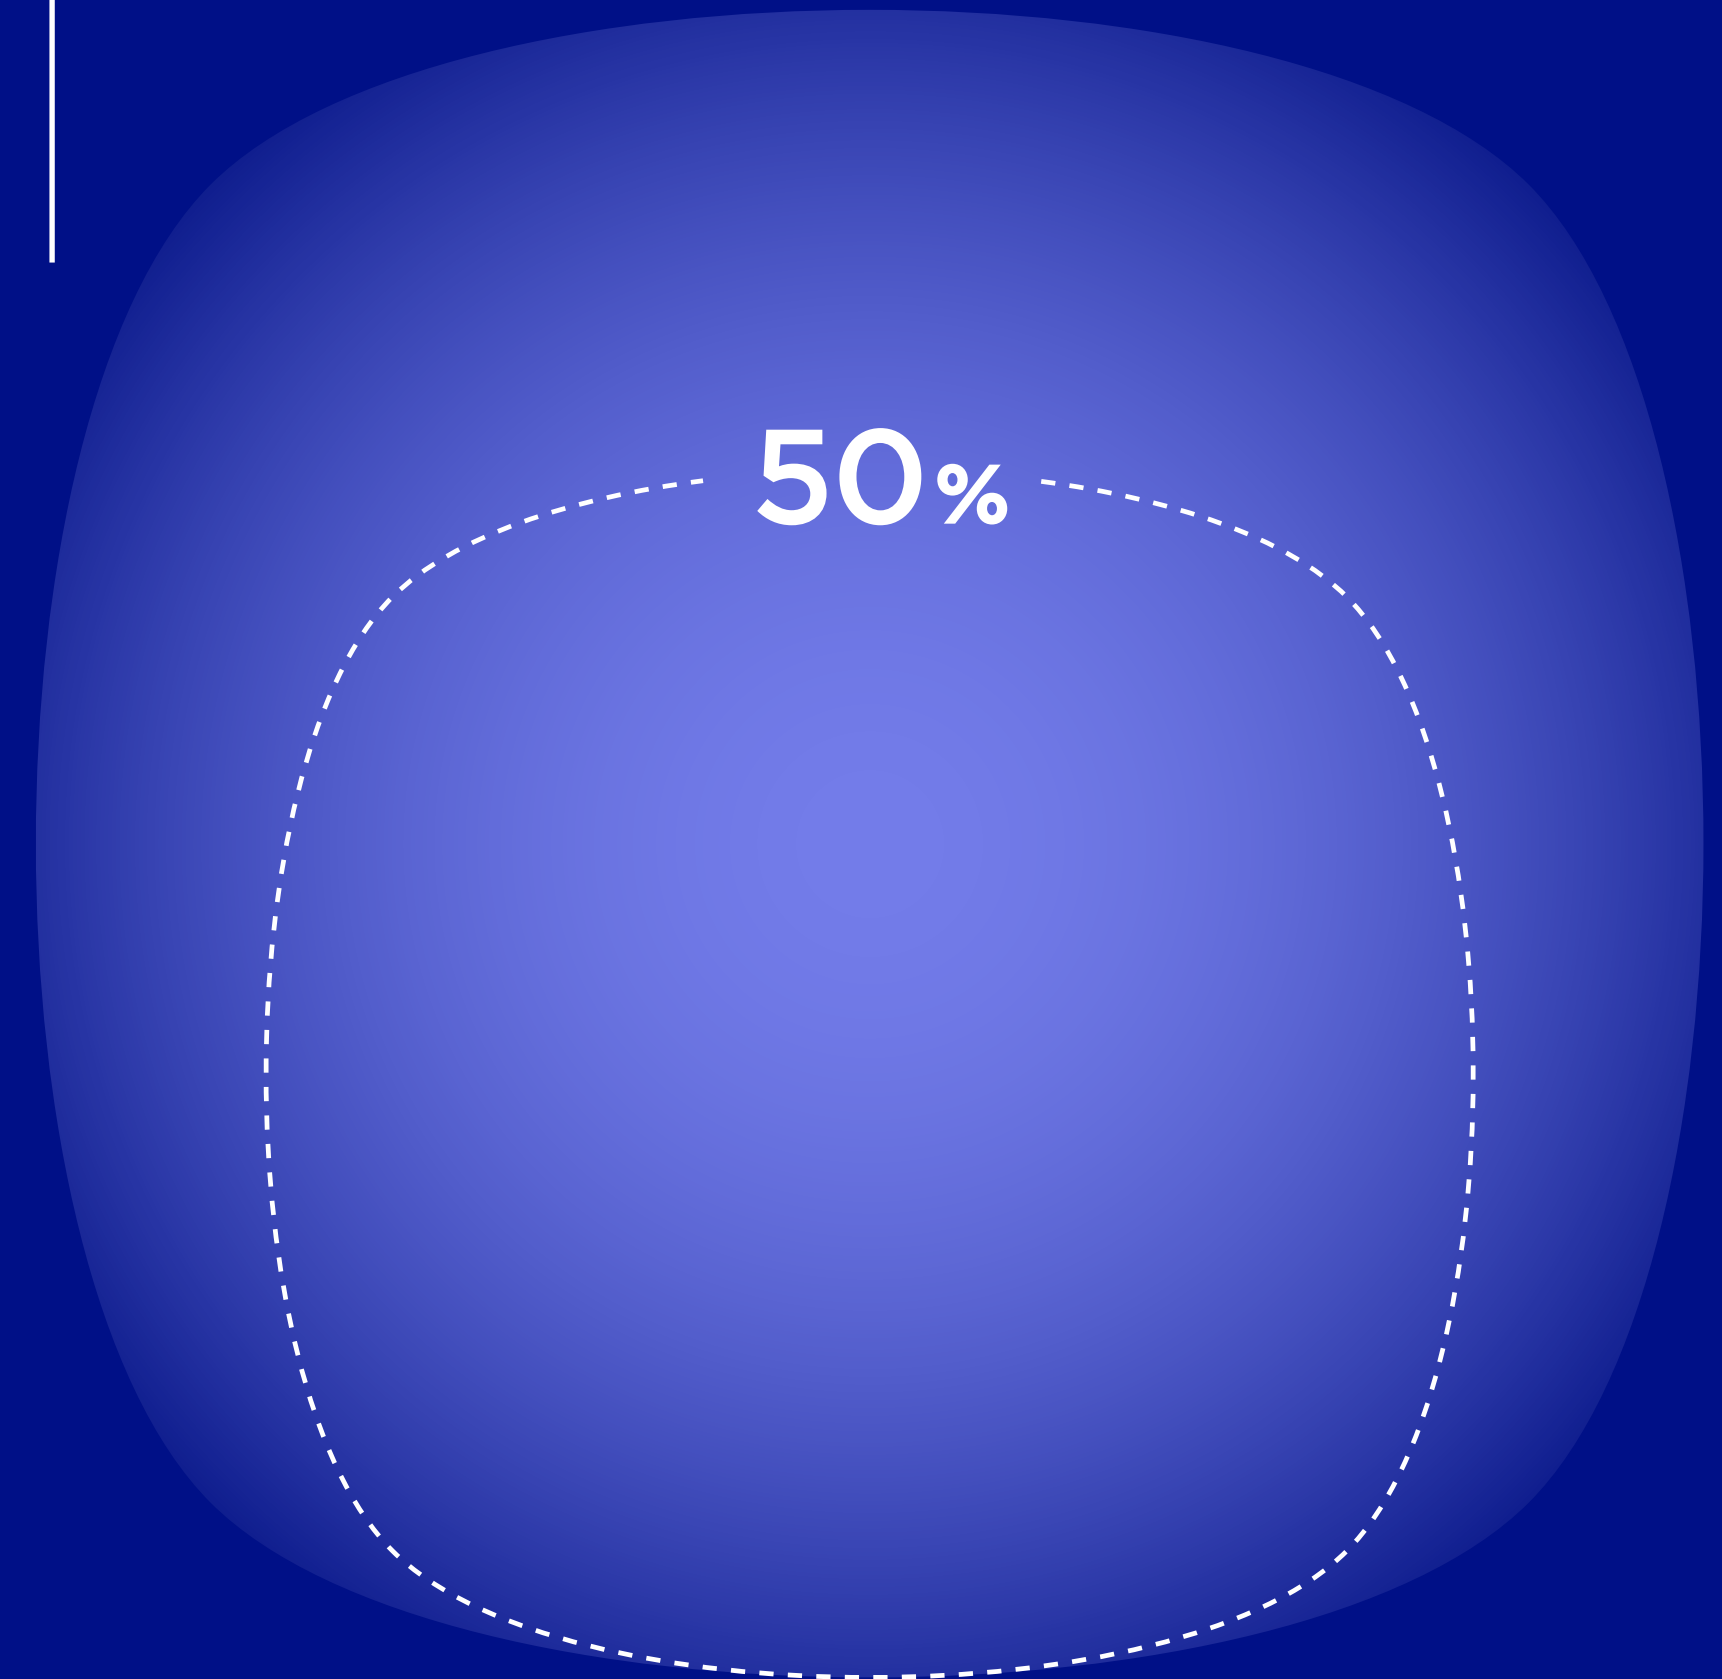

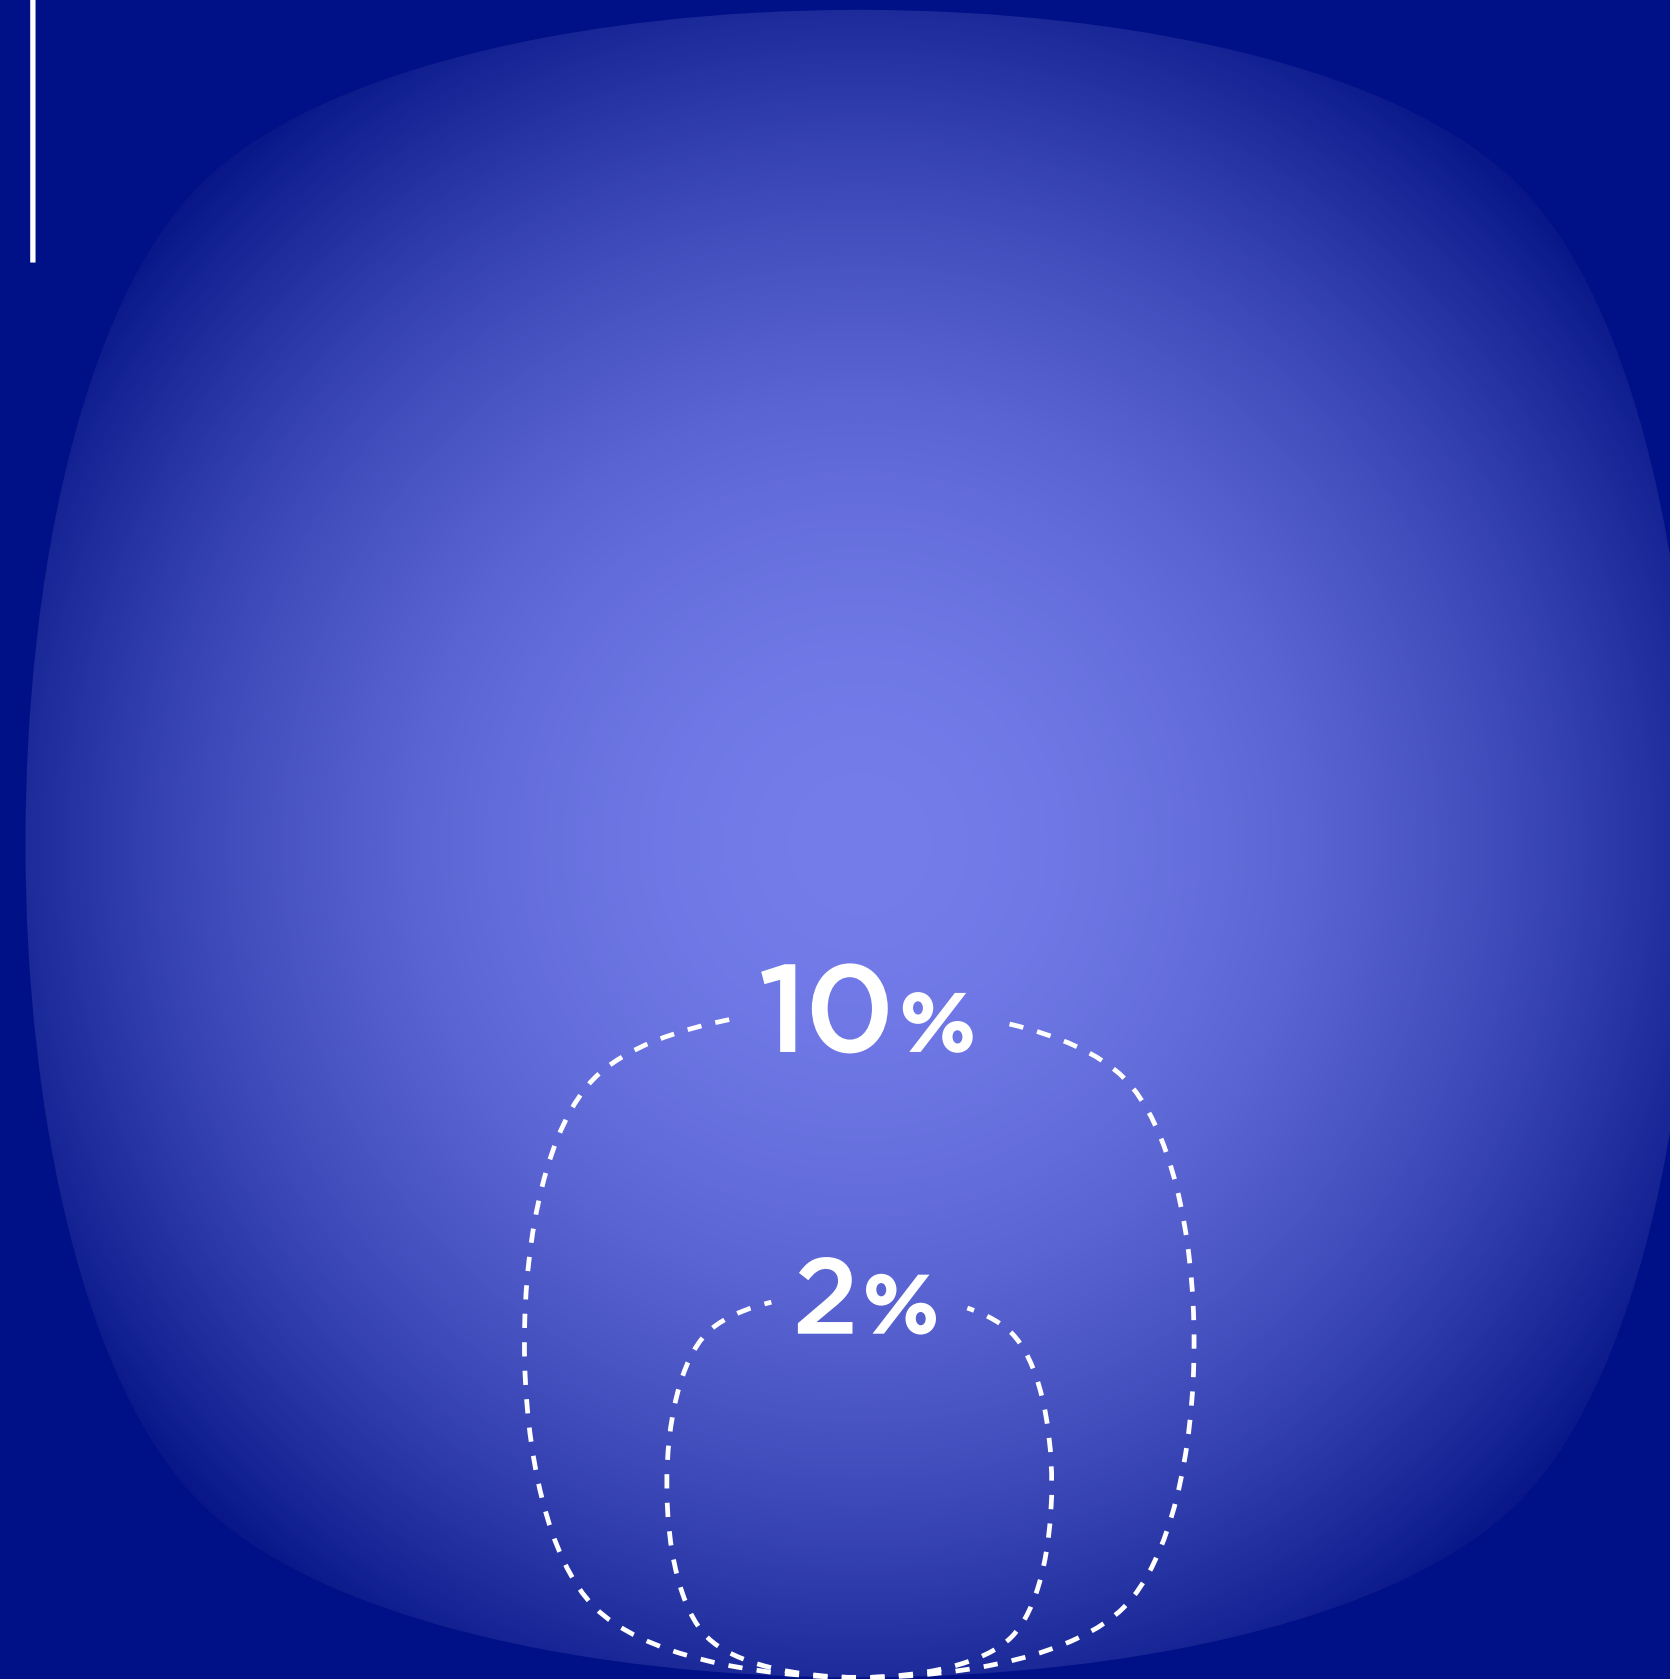

The Percentage Of Buildings Using Modular Construction

2%-10%

In Spain, only 2% of delivered homes follow a modular construction system, which allows for a building to be erected in just a few months. However, some studies predict that this number could reach 10% by 2030.

50%

Whereas in Sweden or the Netherlands, as many as 50% of buildings are constructed using this industrial method.

Advantages of Modular Buildings

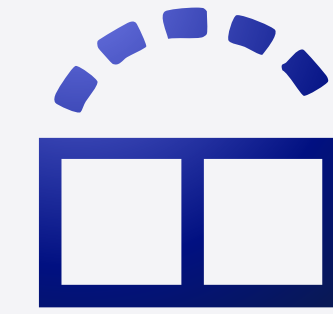

In today's construction industry, efficiency, flexibility, and safety are essential. With advanced design and precision manufacturing, ARK's modular buildings provide faster, more economical, and safer building solutions.

Fast

Quick Deployment, Immediate Use

Factory-built modules reduce construction time by **50%**, enabling faster project completion and quicker operations.

Flexible

Adaptable to Any Need

Customizable designs suit offices, camps, and permanent structures, seamlessly adjusting to different environments.

Economy

Cost-Efficient & Sustainable

Lower labor costs, reduced material waste, and factory-controlled quality ensure a high-value, low-maintenance solution.

Safety

Engineered for Protection

Built with high-strength steel and fire-resistant materials, ARK modules meet **global safety standards** for durability.

03

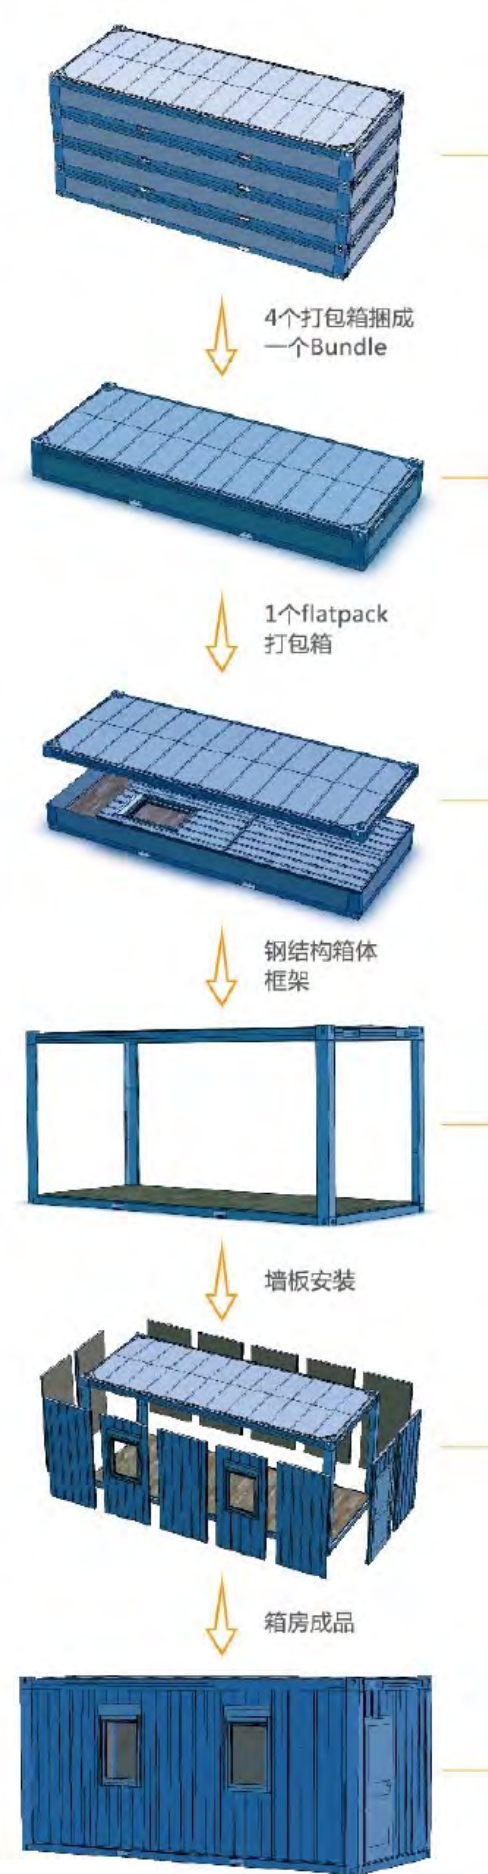

CORE SERVICES & SOLUTIONS

FLATPACK

Flatpacks are the most convenient and popular kind of us, which means all things needed to build one container house are packed together with the roof and the floor into a flatpack, and 4 flatpacks packed into one bundle.

When building, the four corner posts connect the roof and the floor with strong-strengthened bolts; then the walls are made up of the flexible panels systems, after which the container house is built up.

18

Flatpack Size		L	W	H	L	W	H	Height	Weight (KG)
		Exterior			Interior			Package	
Type	8'x10'	2989mm	2435mm	2590mm 2810mm 3100mm	2795mm	2240mm	2310mm 2520mm 2820mm	432mm (6 in 1 bundle) 518mm (5 in 1 bundle) 648mm (4 in 1 bundle) 864mm (3 in 1 bundle) 1296mm (2 in 1 bundle)	1150 1350
	8'x16'	2885mm			4710mm				1600 1750
	8'x20'	6055mm			5860mm				1950 2000
	8'x24'	7296mm			7140mm				2300 2400
	8'x30'	9120mm			8925mm				2550 2800
	10'x20'	6055mm	3000mm		5860mm	2880mm			2020 2220
	1. The mentioned weights are valid for standard configuration and can very depending on configuration and equipment 2. 6 flatpacks in 1 bundle means there's no wall panel inside, the others depend on the configuration and equipment 3. The width of the walkway floors can be customized, but cannot be packed in flatpacks 4. If transported in flatpacks, one bundle will need 3 standard 20' GP shipping space.								

READY BOX

Ready Box is a fully prefabricated modular building, completed in the factory from design to interior, water, electricity, and equipment installation. Customization is available based on client needs.

Once delivered, just connect water and electricity—no extra work on site. With flexible layouts, it's ideal for offices, housing, and commercial use, enabling fast and efficient deployment.

20

BATHROOM POD

Ark Pods use light steel stud as frame and GRC floor tray, this system engineered for superior strength and accuracy. All plumbing and electrical will be integrated and pretested code compliant and ready for hookup.

Internal finished by Tiles or paintings, various textures and colors of tiles/painting are available as per clients requirements. Ark have common POD models as well as special designed for different projects, according to the site research and client requests.

21

BATHROOM POD

Ark Pod Has Many Optional Materials,
Perfectly Displaying Personalized Customization.

	Material Option 1	Material Option 2	Material Option 3
Structure	Light steel frane		
Ceiling	Suspended Alu ceiling	Waterproof gypsun board	Customized suspended ceiling
Wall Finishes	Waterproof gypsum board	Marble tiles	Ceramic tiles
Floor Finishes	Concrete floor finishes	Marble tiles	Ceramic tiles
Lighting	Waterproof LED Lighting		

STORAGE CABIN

ARK storage boxes are designed with light steel, and the box body is self-folding plate packaging. All storage support components are automatically cut and welded on the production line.

The box is light and can be folded and stretched to complete the installation, which is convenient and quick

23

STORAGE CABIN

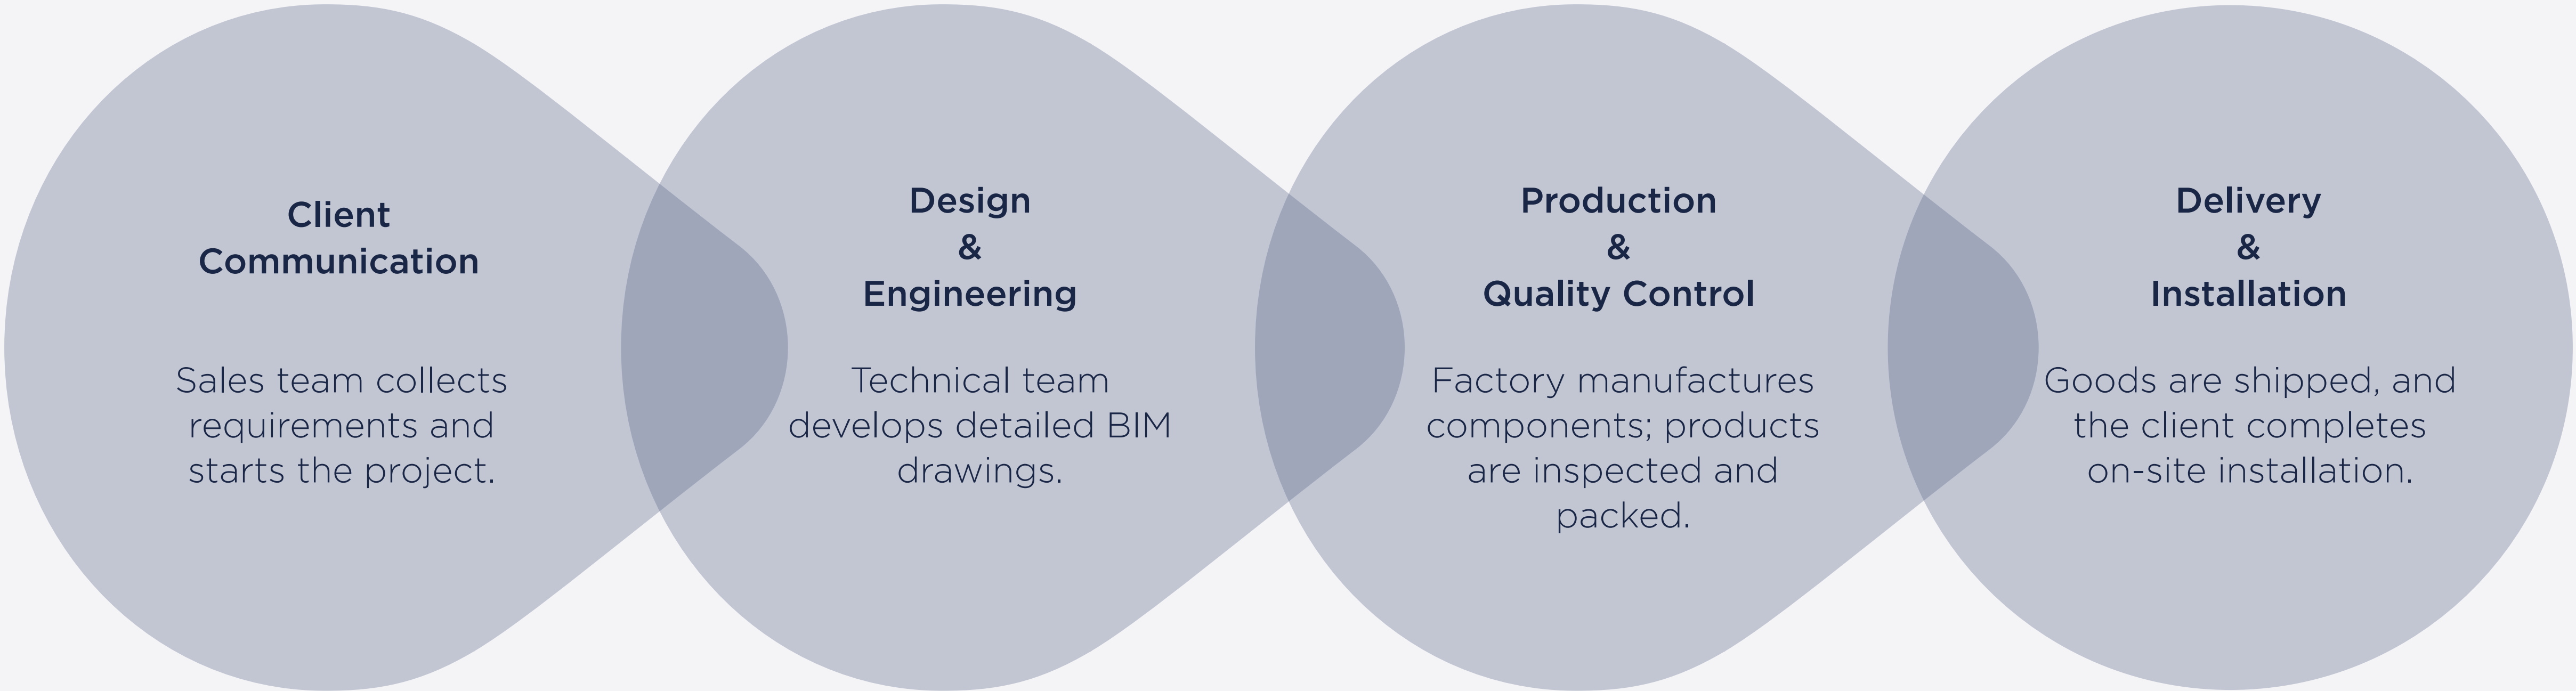

Technical Parameters

		3m Cabin	4m Cabin	5m Cabin	6m Cabin
Dimensions (L x W x H)	Cabin Standard Size	3000*2200*2200mm	4000*2200*2200mm	5000*2200*2200mm	6000*2200*2200mm
	Dimensions in transport position	3000*2200*380mm	4000*2200*380mm	5000*2200*380mm	6000*2200*380mm

Height	External Height	2200mm			
	Inside Height	2200mm			
Structure		2mn galvanized steel			
Roof		0.75mm galvanized steel sheet			
Wall		0.75mm galvanized steel sheet			
Floor	Floor finishes	35mm wooden planks			
	Bottom covering	0.75mm galyanized steel sheet			
Door type		Double-wing steel profile door, 1930*1930mm			
Weight		450kg	560kg	670kg	780kg
Loading		by handling with crane - 1500 kg by handling with forklift truck - 3000 kg of floor surface - 500 kg/m2 of foor surfacewith stiffeninfnf - 300 kg/m2			

WORK FLOW

At ARK Prefab, we uphold the values of professionalism, integrity, and innovation. From the first conversation to final installation, every step of our process is driven by a deep sense of responsibility and precision.

We are committed to delivering high-quality modular solutions with transparency, efficiency, and a sincere dedication to our clients' needs.

CUSTOMIZED SOLUTIONS FOR DIFFERENT MARKETS

Accommodations

Safe, comfortable, and tailored to meet diverse living needs—from temporary housing to long-term residences.

Dining & Hygiene Facilities

Designed to meet essential daily needs with functional, user-friendly layouts that support everyday life.

Workspaces

Flexible and efficient solutions for offices, meeting rooms, and collaborative environments.

Medical & Health Units

Modular solutions for hospitals, clinics, and medical stations—prioritizing hygiene, functionality, and rapid deployment.

Recreation & Leisure

Spaces for fitness, recreation, and relaxation—enhancing quality of life both indoors and outdoors.

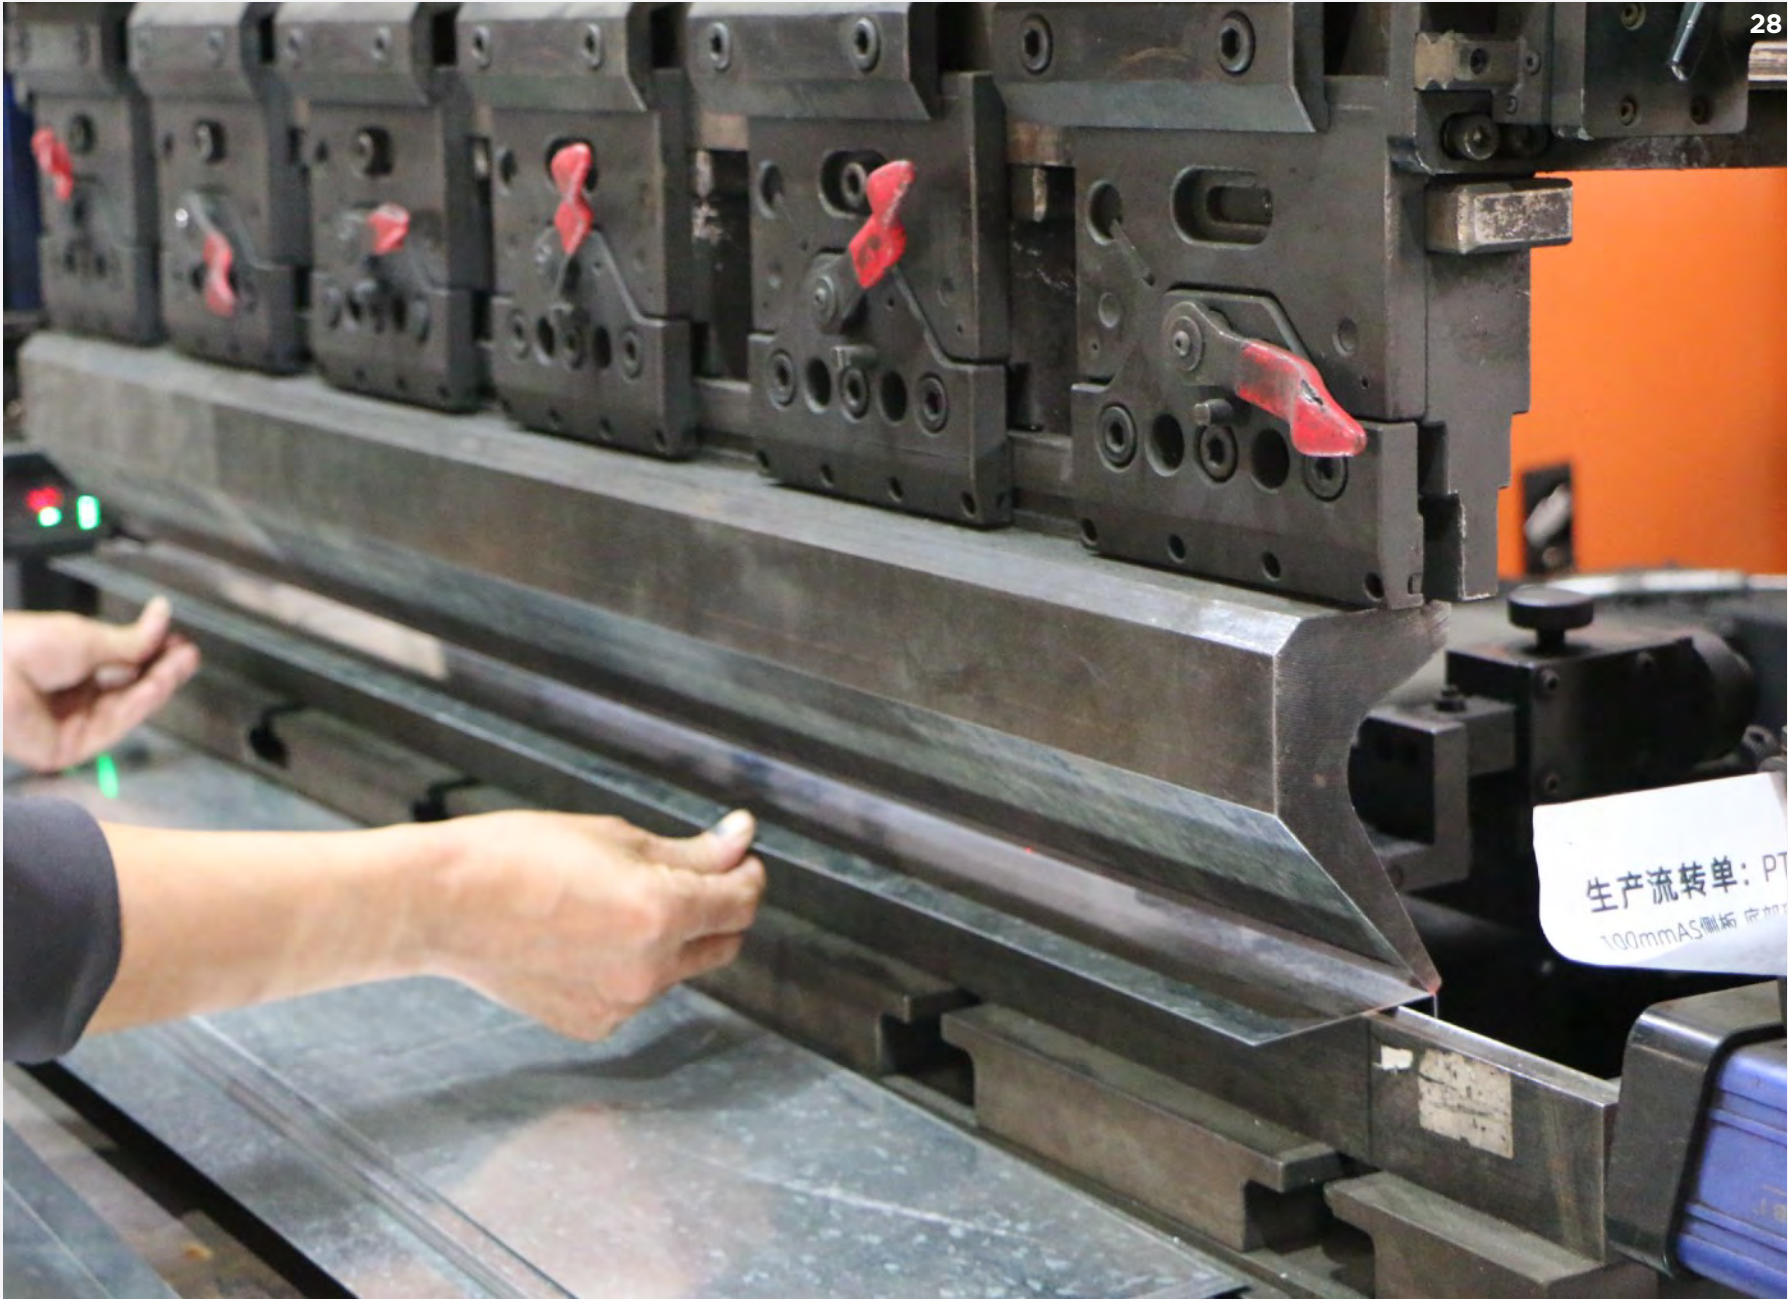

Storage & Logistics

Secure, scalable, and adaptable storage modules designed to optimize space and streamline logistics operations.

04

MANUFACTURING & PRODUCTION CAPABILITIES

QUALITY CONTROL AND SAFETY STANDARDS

At ARK Prefab, quality and safety are not just requirements—they are the foundation of everything we build.

We implement strict quality control procedures and adhere to international safety standards at every stage of the project. Our goal is to deliver products that are not only durable and reliable, but also safe for all users.

Precision

Every module is manufactured and assembled with exacting standards, ensuring consistent quality and seamless integration on-site.

Compliance

We strictly follow global construction codes and safety regulations, from material sourcing to final inspection.

Accountability

Our teams take full responsibility at each phase of the process—tracking quality metrics, conducting regular audits, and ensuring full transparency with clients.
